No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (27 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1988 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

CONTENTS OF VOLUME 35

Number 1, January 1988

NORMAN B. ACKERMAN AND ROGER JACOBS. The Effects of Steroidal and Nonsteroidal Anti-inflammatory Agents on Uptake of Evans Blue in Experimental Metastasis	1
WILLIAM L. JOYNER, RIAD E. MOHAMA, AND JOSEPH P. GILMORE. Specificity of Arginine Vasopressin and Angiotensin II for Microvessels in the Hamster Cheek Pouch after the Induction of Renovascular Hypertension	8
C. ORLANDI, M. ROSSI, AND G. FINARDI. Evaluation of the Dilator Capacity of Skin Blood Vessels of Hypertensive Patients by Laser Doppler Flowmetry	21
R. E. LEWIS AND H. J. GRANGER. Diapedesis and the Permeability of Venous Microvessels to Protein Macromolecules: The Impact of Leukotriene B ₄ (LTB ₄)	27
JEN-SHIH LEE. Assessing the Deformation of Pulmonary Capillaries Produced by Ventilation	48
MICHAEL J. WHITE, FREDERICK N. MILLER, LOUIS S. HEUSER, AND CATHERINE GILLEY PIETSCH. Human Malignant Ascites and Histamine-Induced Protein Leakage from the Normal Microcirculation	63
G. DRIESSEN, H. SCHEIDT, W. INHOFFEN, A. SOBOTA, H. MALOTTA, AND H. SCHMID-SCHÖNBEIN. A Comparative Study: Perfusion of the Micro- and Macrocirculation as a Function of the Hematocrit Value	73
GEORGE A. PANTELY, LYLE J. SWENSON, CHERRY H. TAMBLYN, GEOFFREY V. F. SEAMAN, CHERYL G. ANSELONE, W. BEN JOHNSON, AND J. DAVID BRISTOW. Increased Vascular Resistance Due to a Reduction in Red Cell Deformability in the Isolated Hind Limb of Swine.....	86
STEPHEN J. LAI-FOOK AND MARK R. KAPLOWITZ. Pleural Protein Concentration and Liquid Volume in Spontaneously Hypertensive Rats	101
J. R. LEVICK AND A. D. KNIGHT. Interaction of Plasma Colloid Osmotic Pressure and Joint Fluid Pressure across the Endothelium-Synovium Layer: Significance of Extravascular Resistance	109
WILLIAM L. JOYNER, RIAD E. MOHAMA, TERRY O. MYERS, AND JOSEPH P. GILMORE. The Selective Response to Adenosine of Renal Microvessels from Hamster Explants	122
WILLIAM I. ROSENBLUM. Loss of Endothelium-Dependent Relaxation in Mouse Cerebral Microvessels May be Rapidly Reversible	132
BRIEF COMMUNICATION	
J. A. JOLLES, H. A. KOOMANS, AND R. J. BERCKMANS. Colloid Osmotic Pressure of Subcutaneous Wick Fluid in Rats	139

Number 2, March 1988

GORDON R. NEUFELD, STEPHEN R. GALANTE, JOYCE M. WHANG, DONALD DEVRIES, JAMES E. BAUMGARDNER, DAVID J. GRAVES, AND JOHN A. QUINN. Skin Blood Flow from Gas Transport: Helium Xenon and Laser Doppler Compared	143
MARY E. GERRITSEN, THERESA M. BURKE, AND LESLIE A. ALLEN. Glucose Starvation Is Required for Insulin Stimulation of Glucose Uptake and Metabolism in Cultured Microvascular Endothelial Cells	153
ILENE SUSSMAN, MARY PAT CARSON, ANTHONY L. MCCALL, VERA SCHULTZ, NEIL B. RUDERMAN, AND KEITH TORNHEIM. Energy State of Bovine Cerebral Microvessels: Comparison of Isolation Methods	167
WILLIAM G. MAYHAN, FRANK M. FARACI, AND DONALD D. HEISTAD, with the technical assistance of Cynthia M. Lynch. Effects of Vasodilatation and Acidosis on the Blood-Brain Barrier	179
J.-U. MEYER, P. BORGSTRÖM, L. LINDBOM, AND M. INTAGLIETTA. Vasomotion Patterns in Skeletal Muscle Arterioles during Changes in Arterial Pressure	193
J. M. TARBELL, M. J. LEVER, AND C. G. CARO. The Effect of Varying Albumin Concentration of the Hydraulic Conductivity of the Rabbit Common Carotid Artery	204
EDWARD C. CARLSON. Topographical Specificity in Isolated Retinal Capillary Basement Membranes: A High-Resolution Scanning Electron Microscope Analysis	221
BRIEF COMMUNICATIONS	
CHARLES H. BOWEN AND KURT H. ALBERTINE. Initial Lymphatics Are Present in the Loose Areolar Connective Tissue of the Golden Hamster's Cheek Pouch	236
RITCHIE FROELICH, ROGER BUCHANAN, AND ROGER WAGNER. Isolation and Separation of Fenestrated and Continuous Capillary Endothelium by Using Magnetic Beads	242

Number 3, May 1988

DAVID SHEPRO. The American Microcirculatory Society Landis Award Lecture. Endothelial Cells, Inflammatory Edema, and the Microvascular Barrier: Comments by a "Free Radical"	247
WERNER RISAU, ELISABETH SWEET, AND PATRICIA A. D'AMORE. Preferential Expression of a 130,000-Da Cell Surface Protein by Vascular Wall Cells <i>in Vitro</i> and <i>in Vivo</i>	265
NANCY R. STEVENSON AND HARVEY R. WEISS. Blood Flow, O ₂ Extraction and O ₂ Consumption along the Rat Small Intestine	278
JONATHAN K. WILKIN. Periodic Cutaneous Blood Flow during Aldehyde-Provoked Hyperemia	287

RICHARD J. MONTGOMERY, BENJAMIN D. SUTKER, JAMES T. BRONK, STEPHEN R. SMITH, AND PATRICK J. KELLY. Interstitial Fluid Flow in Cortical Bone	295
J. S. ALEXANDER, H. B. HECHTMAN, AND D. SHEPRO. Phalloidin Enhances Endothelial Barrier Function and Reduces Inflammatory Permeability <i>in Vitro</i>	308
KAREL TYML AND KAROL MIKULASH. Evidence for Increased Perfusion Heterogeneity in Skeletal Muscle during Reduced Flow	316
ANTHONY L. MCCALL, JAMES VALENTE, REYNALDO CORDERO, NEIL B. RUDERMAN, AND KEITH TORNHEIM. Metabolic Characterization of Isolated Cerebral Microvessels: ATP and ADP Concentrations.....	325
DANIEL RICHARDSON. Effects of Gravity on Regional and Capillary Blood Flows in the Human Toe	334
MARY L. ELLSWORTH, ALEKSANDER S. POPEL, AND ROLAND N. PITTMAN. Assessment and Impact of Heterogeneities of Convective Oxygen Transport Parameters in Capillaries of Striated Muscle: Experimental and Theoretical	341
BRIEF COMMUNICATIONS	
AUDREY ROBINSON-WHITE, JONATHAN L. COSTA, JEAN-MARIE LAUNAY, AND DENISE D. FAY. Presence of Phenolsulfotransferase Activity in Microvascular Endothelial Cells: Formation of 5-HT- <i>O</i> -Sulfate in Intact Cells	363
JOHN E. BASSETT, DANIEL F. BOWEN-POPE, MASAKAZU TAKAYASU, AND RALPH G. DACEY, JR. Platelet-Derived Growth Factor Does Not Constrict Rat Intracerebral Arterioles <i>in Vitro</i>	368

Information for Contributors

Microvascular Research (MVR) is an international journal dedicated to the dissemination of fundamental information related to the microvascular field.

Submission of Manuscripts. One original and two complete carbon copies should be sent via first-class mail, in flat form, to **Microvascular Research Editorial Office, Dr. David Shepro, 2 Cummington St., Boston University, Boston, Massachusetts 02215**. MVR will not be responsible for manuscripts lost in the mails.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be nor is presently submitted elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Microvascular Research* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Manuscript Style. Papers should be typewritten, double-spaced on one side of the paper, with wide margins. The manuscript should be divided into the following sections: Abstract, Introduction, Materials and Methods, Results, Discussion, References, and Acknowledgments. The abstract, which will precede each article, should be 225 words or less and should be typed on a separate sheet. In addition the manuscript should include, on separate pages, (1) the complete title with names of authors and affiliations (including ZIP CODE), (2) running title, consisting of no more than 40 characters including spaces, (3) key words that are suitable as **Index Descriptors**, and (4) the address to which proofs are to be mailed.

Tables. Tables are to be typed on separate sheets and numbered with Arabic numerals. Each table should contain an explanatory title that would make reference to the text unnecessary.

Figures. These should be numbered with Arabic numerals and should be mentioned consecutively in the text. Legends are to be typed together on a separate sheet.

Illustrations, drawn with a lettering set, should be in finished form ready for photographic reproduction. Lettering on the original drawing should be large enough (minimum, 4 mm) to be legible after reduction to one-third. Graphs should be plotted with black India ink on light blue coordinate paper, no larger than 8.5×11 inches, with coordinates properly labeled; grid lines that are to show in the reproduction should be inked in black.

Photographs should be submitted as glossy prints and not marred by staples, paper clips, or pencil marks. For best reproduction of halftones, provide clear, sharp photographs with adequate contrast. The best results will be obtained if authors match the contrast and density of all figures appearing on a single plate. If this is not possible, please provide unmounted original art. Providing an overlay that indicates the most critical areas of micrographs will also aid in ensuring high-quality reproduction. The dimensions of the printed page are 5×8 in. (127×203 mm). It is recommended that micrographs be submitted as near as possible to this size so that large reductions will not be necessary.

Illustrations in color can be accepted only if the authors defray the cost.

Footnotes. These should be designated in the text by superscript numbers and typed on a separate sheet; in the tables by superscript letters and typed at the bottom of the table.

Abbreviations. In general these should follow the usage employed by Chemical Abstracts. The *Style Manual*, 1986, of the American Chemical Society is also an acceptable guide.

References. Citations in the text consist of the author's name, and the year of publication in parentheses. The references should be listed alphabetically and should conform to the following style:

GRAYSON, J., AND LEVESON, M. (1985). Functional and morphological changes in the microcirculation of the dog following acute coronary artery ligation. *Microvasc. Res.* **29**, 161-175.

ALLEN, J. C., AND BUKOSKI, R. D. (1982). Current status of vascular smooth muscle subcellular calcium regulation. In "Vascular Smooth Muscle: Metabolic, Ionic, and Contractile Mechanisms" (M. F. Crass III and C. D. Barnes, Eds.), pp. 99-134. Academic Press, New York.
